

Content Management Systems

Gone are the days when to run a constantly updated website you needed a webmaster.

St Helens Web Design are able to offer the latest in Internet software to enable you to control your site's content once it has been built.

No knowledge of complex html programming is required - you just create your document in a 'What You See is What You Get' (WYSIWYG) editor and then point the document to the area on the site that you want it to be displayed. It really is that simple!
